

vivalyte

SMART LED SOLUTIONS

BACKLIT

Backlit LED bars

VDL-SN5

Vivalyte's backlit solutions are suitable for slim lightboxes, starting from cm depth. The high quality SMD 3030 LEDs bring high efficacy and ensure stable and perfectly even light distribution on the image.

VDL-SN5

General specifications

Input voltage	24 VDC
Efficacy	110 lm/W
CRI	≥ 80 (90 optional)
IP class	IP60
Lifetime	> 50 000H L70
LED type	SMD 3030
Certificates	CE/RoHS/UL

Applications

- Interior design
- Retail and exhibitions
- Backlit banners
- Light ceilings & walls

Key features

Indoor use

High-quality
SMD 3030

3 years warranty

Dimmable

Easy connection
and installation

Dimensions

Light distribution graph

Safety & operation instructions

- Requires proper installation by qualified people
- All connections must be made while disconnected from the main power
- For indoor installation environment only
- Operating temperature range: -20°C to 60°C
- Storage temperature range: -20°C to 70°C
- LED bars can be fixed with screws, clean surface required
- 24V DC finput: safe, low voltage loss & longer run

Specifications

Article name	Length	LED (pcs)	Input voltage	Power	Light output	Max. in serial connection	Efficacy	Cuttable

Backlit LED bars

VDL-SN4T

Vivalyte's unique backlit solutions are suitable for **ultra-thin lightboxes**, 3-10 cm depth. The first quality SMD LEDs ring **high brightness** and ensure **stable and perfectly even light distribution**.

VDL-SN4T

General specifications

Input voltage	24VDC (12V optional)
Current	Constant voltage
Efficacy	90 lm/W
CRI	>80
Power consumption	5 or 10 W
IP class	IP60
Lifetime	30 000H L70
LED type	SMD 2835
Certificates	CE/RoHS/UL

Applications

- Interior design
- Retail & exhibition stand
- Banners
- Ceilings & walls

24V
12V

September 2021

The information and data given are typical for the equipment described. However, any individual item is subject to change without prior notification

Features

1. Adopt high quality 2835 LED
2. Self-designed secondary lens with 170° beam angle for uniform light
3. Aluminum PCB for direct and quick heat dissipation
4. Curtain style, easy mounting.
5. Two lengths for option, customization available.
6. lighting evenness of light box surface up to 0.9
7. Achieve light effect change by external controller

Lighting Mode

Application

Suitable for back-lit lightbox with depth of 6-18cm.

Installation

Fix by screws or adhesive tape

Specification

Model No.	Light Color	Color Temperature(K)	Beam Angle	CRI	Typical Luminous Flux value(lm/pcs)	Efficacy (lm/W)	Voltage (V DC)	Power (W/pcs)
VDL-SN4-DW-62016	W	6500	170°	70+	691	90	24V	8
	N	2700			707	92		
VDL-SN4-DW-77020	W	6500	170°	70+	864	90	24V	10
	N	2700			883	92		

Other Parameters

Model No.	LED Quantity/pc	Product Size L*W*H(mm)	Standard Packing Quantity (pcs/string)	Working Temperature	Storage Temperature
VDL-SN4-DW-62016	16	620*20*7.1	10	-20~+60°C	-20~+70°C
VDL-SN4-DW-77020	20	770*20*7.1			

NOTE:

1. Test environment temperature : 25±2°C.
2. The above data is typical values. The actual data of each single product may differ from the typical values. The data is subject to change without notice.
3. Luminous flux above is tested with single-color light on at 8000-9000K.
4. Different color temperature will make luminous flux different.
5. The Luminous flux&power tolerance within ±10%.

3.Products and Tools

LED power supply

Diagonal pliers

Connection Terminals

4.Installation Methods and Steps

Method one: fix by double-sided foam tape and screws

①

②

③

④

1. Clean the mounting surface.
2. Arrange the mounting space.
3. Peel away the self adhesive tape on the rear of product and evenly mounting the product with appropriate space.
4. For bare wire connection, please use terminals.
Treat the thread with insulation,waterproof, and anti-corrosion arrangement as it cannot pull out by hands.
5. Check and ensure correct installation, and fix the product with screws ,then power on for self-test.

Note:

1. Screw to avoid welding plate, avoiding short circuit
2. When fastening the screw, make sure to add plastic gaskets to insulate the screw from the LED panel.

Attentions before installation

- Before installation, check that the product parameters are consistent with the requirements (Seeing product specifications or product labels)
- Load voltage, current, power and power supply should be matched with the product.
- Follow the instructions of wiring diagram (first connect the load and then the power supply) to avoid short circuit.
- Make sure the correct connection of positive and negative poles between products and power supply. Otherwise, the light will not be on.
- Make sure the power cord firmly screwed into the terminal and it should not be pulled out by hands.
- The terminal should have insulation, waterproof and anti-corrosive treatment.
- Please take and use the product gently to avoid damage.

Common Faults and Troubleshoot

Quick Guide		
Problems	Reasons	Solutions
All LEDs can not light on.	No electric supply.	Power on
	Automatic power protection from the open or short circuit in output of the power supply.	Fix the short circuit problem.
	Wrong connection of power supply.	
LEDs can not light on partly.	Some switching mode power supplies are not powered.	Check the power supply system to fix it.
	Power supply line error.	
	Mistaken wire connection of some of products	Correctly connection
Brightness of LED is inconsistent or insufficient.	Power overloaded.	Replace with more powerful power
	Power supply circuit excessive consumption.	Make sure the working voltage of the product within $\pm 5\%$ of standard voltage, or keep balance by circuit power consumption.
	Excessive quantities in series connection of the product	Reduce the quantities of the product in series connection to meet requirement.
LED flicker.	Connection point fault.	Remove bad connection point.
	Switching power supply failure.	Replace a new power supply.
	Wrong Installation or use of products	Please follow the instructions

Warning

- Do not disassemble or retrofit the light. Do not touch the surface of the light with a sharp object.
- Do not do live-line working during installation, especially for high voltage product.
- Do not use any organic chemical solvents.
- Use neutral glass adhesive to fix this product and it needs to be dried 4 hours in the open environment after operation.
- Treat the ends and the circuit connection points that are not connected to the main line with insulation, waterproof, and anti-corrosion in the installation.
- Use 18AWG (0.75mm² cross-sectional area) or thicker core wire to avoid adverse consequences caused by overheating, if the power cable need to lengthen.
- Make sure the input voltage meets the requirements and lines are connected correctly before lighting on.
- This product is for signage, and do not use as general lighting.
- Series connection within the max run.
- The length of the power cable between the power supply and the led strip should not exceed 2 meters. Otherwise, large circuit loss will lead to inconsistent brightness.
- Installation, maintenance and repair should be operated by a qualified technician.

Statements and Recycling

Statements:

Repair should be operated by a qualified technician, if the external circuit or main line of this product is damaged.
The parameters given in this manual are typical values and for reference only.
All illustrations and drawings in this manual are for reference.
This product is subject to change without notice.

Recycling:

LED lighting products belongs to electronic products, please do recycling treatment according to the relevant WEEE directives.

Features

- Adopt RGB in one 2830 LED
- Good color-mixing effect and stability
- Special lens with 170° beam angle, suitable for thin light box
- Create rich color changing effect via controller
- Adopt standard terminals for easy usage

Application

- Suitable for RGB lightbox with thickness above 7cm etc.

Installation

- Prefix with self adhesive tape and fix with screws

Optical & Electrical Parameters

Model No.	Light Color	Color Temperature/ Wavelength(nm/k)	Beam Angle	Ra	Typical Luminous Flux(lm/pcs)	Efficacy (lm/w)	Voltage (DC V)	Power (W/pcs)

Average Illumination(with RGB light on)

Packaging Information

Put the product into PE bag.

Seal the bag in two ends and label it.

Separate the product layer by layer with foam.

Put the product and accessories bag into carton box.

Seal and label the box.

Use packing belt to pack. Add edge protectors if necessary.

Packaging information

Model No.	Product Size(mm)	Carton Size(mm)	Total Quantity(pcs)	Net Weight(kg)	Gross Weight(kg)
VDL-SN-RGB3in1-48-6	480*25*7.3	550*400*340	216	15.34(1±10%)	16.65(1±10%)

Note:

- Shipping materials: PE bags and carton box.
- The above quantity and weight are only for the illustrated packaging method. There will be differences in the quantity and weight with other packaging methods.

Installation

			8	231			
			9	210			
			10	190			

Note:

- The colored light is tested with brightness(cd/m), and here is the data with RGB three lights normally on.
- BQ5-A is 0.5m per bar, please pay attention to the installation density.
- Spacing, see upper left;
- Please ask the sales for data of other depth or colors.

2. Accessories & Tools

LED power supply

Tools: Diagonal pliers

Mounting gaskets

M3 Self-tapping screw

Electric batch and electric drill

Clip bar

Connection terminal

3. Installation steps

1. Method one: fix by double-sided foam tape and screws

Clean the mounting surface.

Arrange the mounting space.

Peel away the self adhesive tape on the rear of product and evenly mounting the product with appropriate space.

Connect the DC output end of power supply with product and connect the controller. Treat the thread with insulation, waterproof, and anti-corrosion arrangement as it cannot pull out by hands.

Check and ensure correct installation, and fix the product with screws, then power on for self-test.

Note:

- Screw to avoid welding plate, avoiding short circuit
- When fastening the screw, make sure to add plastic gaskets to insulate the screw from the LED panel.

2.Method two: fix by clip bar

Clean the mounting surface.

Evenly mounting the clip bars with appropriate space and fix with screws.

Fix the product one by one with clips on the bar.

Cut off the excess rigid bar.
Note: Cut in the middle of the wire.

Please fix by at least two terminals if the product need to be connected, and treat the thread with insulation, waterproof, and anti-corrosion arrangement as it cannot pull out by hands.

Install the power supply and treat the thread.

Note: make sure the metal clip bar without reach any live part to avoid short circuit.

Attentions

- Before installation, check that the product parameters are consistent with the requirements (Seeing product specifications or product labels)
- Load voltage, current, power and power supply should be matched with the product.
- Follow the instructions of wiring diagram (first connect the load and then the power supply) to avoid short circuit.
- Make sure the correct connection of positive and negative poles between led module and power supply. Otherwise, the light will not be on.
- Make sure the power cord firmly screwed into the terminal and it should not be pulled out by hands.
- The terminal should have insulation, waterproof and anti-corrosive treatment.

Backlit RGB full color LED bars

VDL-SN-RGB

Vivalyte backlit RGB full color solutions are a perfect fit for rich color rendered lightboxes or backlit illuminated surfaces, where the perfect homogeneity would play a vital role on the vivid visual experiences.

VDL-SN-RGB

General specifications

Input voltage	24 VDC
Current	constant current regulated
Power consumption	< 12 W
IP class	IP20
LED type	Osram RGB LED
Certificates	CE/RoHS/UL

Applications

- Interior design
- Retail and exhibitions
- Large ceilings & walls

Key features

Indoor use

RGB full color

5 Years warranty

Dimmable

Easy connection
and installation

Light distribution graph

Beam angle 170°

Safety & operation instructions

- Requires proper installation by qualified people
- All connections must be made while disconnected from the main power
- Non-water-resistant product for indoor installation environment
- Operating temperature range: 25°C to 60°C
- Storage temperature range: -25°C to 70°C
- LED bars can be fixed with screws or silicone on a clean surface
- 24 V DC input: safe, stable & reliable.
